

Yasaman Ezazi

Education

McGill University

Candidate for MSc Applied Biotechnology

Start Date: September 2016

Guilan University

Master of Science (Genetics)

2013-2015

Azad University of Tonekabon

Bachelor of Science (Genetics)

2009-2013

Experience

Teaching Assistant, Guilan University

Ran lab sessions and coached students on using the laboratory instruments and insuring the proper procedures were followed.

Responsible for promoting safe and clean working environment.

Prepared materials and assisted in laboratory and experimental procedures.

Assisted in the evaluation of students' lab notebooks and quizzes.

Lab Assistant, Alzahra Hospital

Prepared samples/specimens and performed laboratory tests following strict methodologies in order to produce reliable and precise data to interpret results and carry out analysis.

Documented all activities, recorded results and inserted/retrieved to present to senior colleagues.

Research Assistant, Department of Biology

Conducted a group project under supervision of Dr. Farhad Mashayekhi to study the relationship of soluble forms of receptors and proteins concentration in the biological fluids in the patients with endometriosis in order to find a possible biomarker.

Leadership/Engagement

Vice President Student Life, Biotechnology Graduate Student Society 2017

Organized social and networking events for biotechnology students.

Listened to the students concerns and addressed them to the biotech professors to provide a collaborative environment between students and faculty.
